## Welcome to eBike Nomads

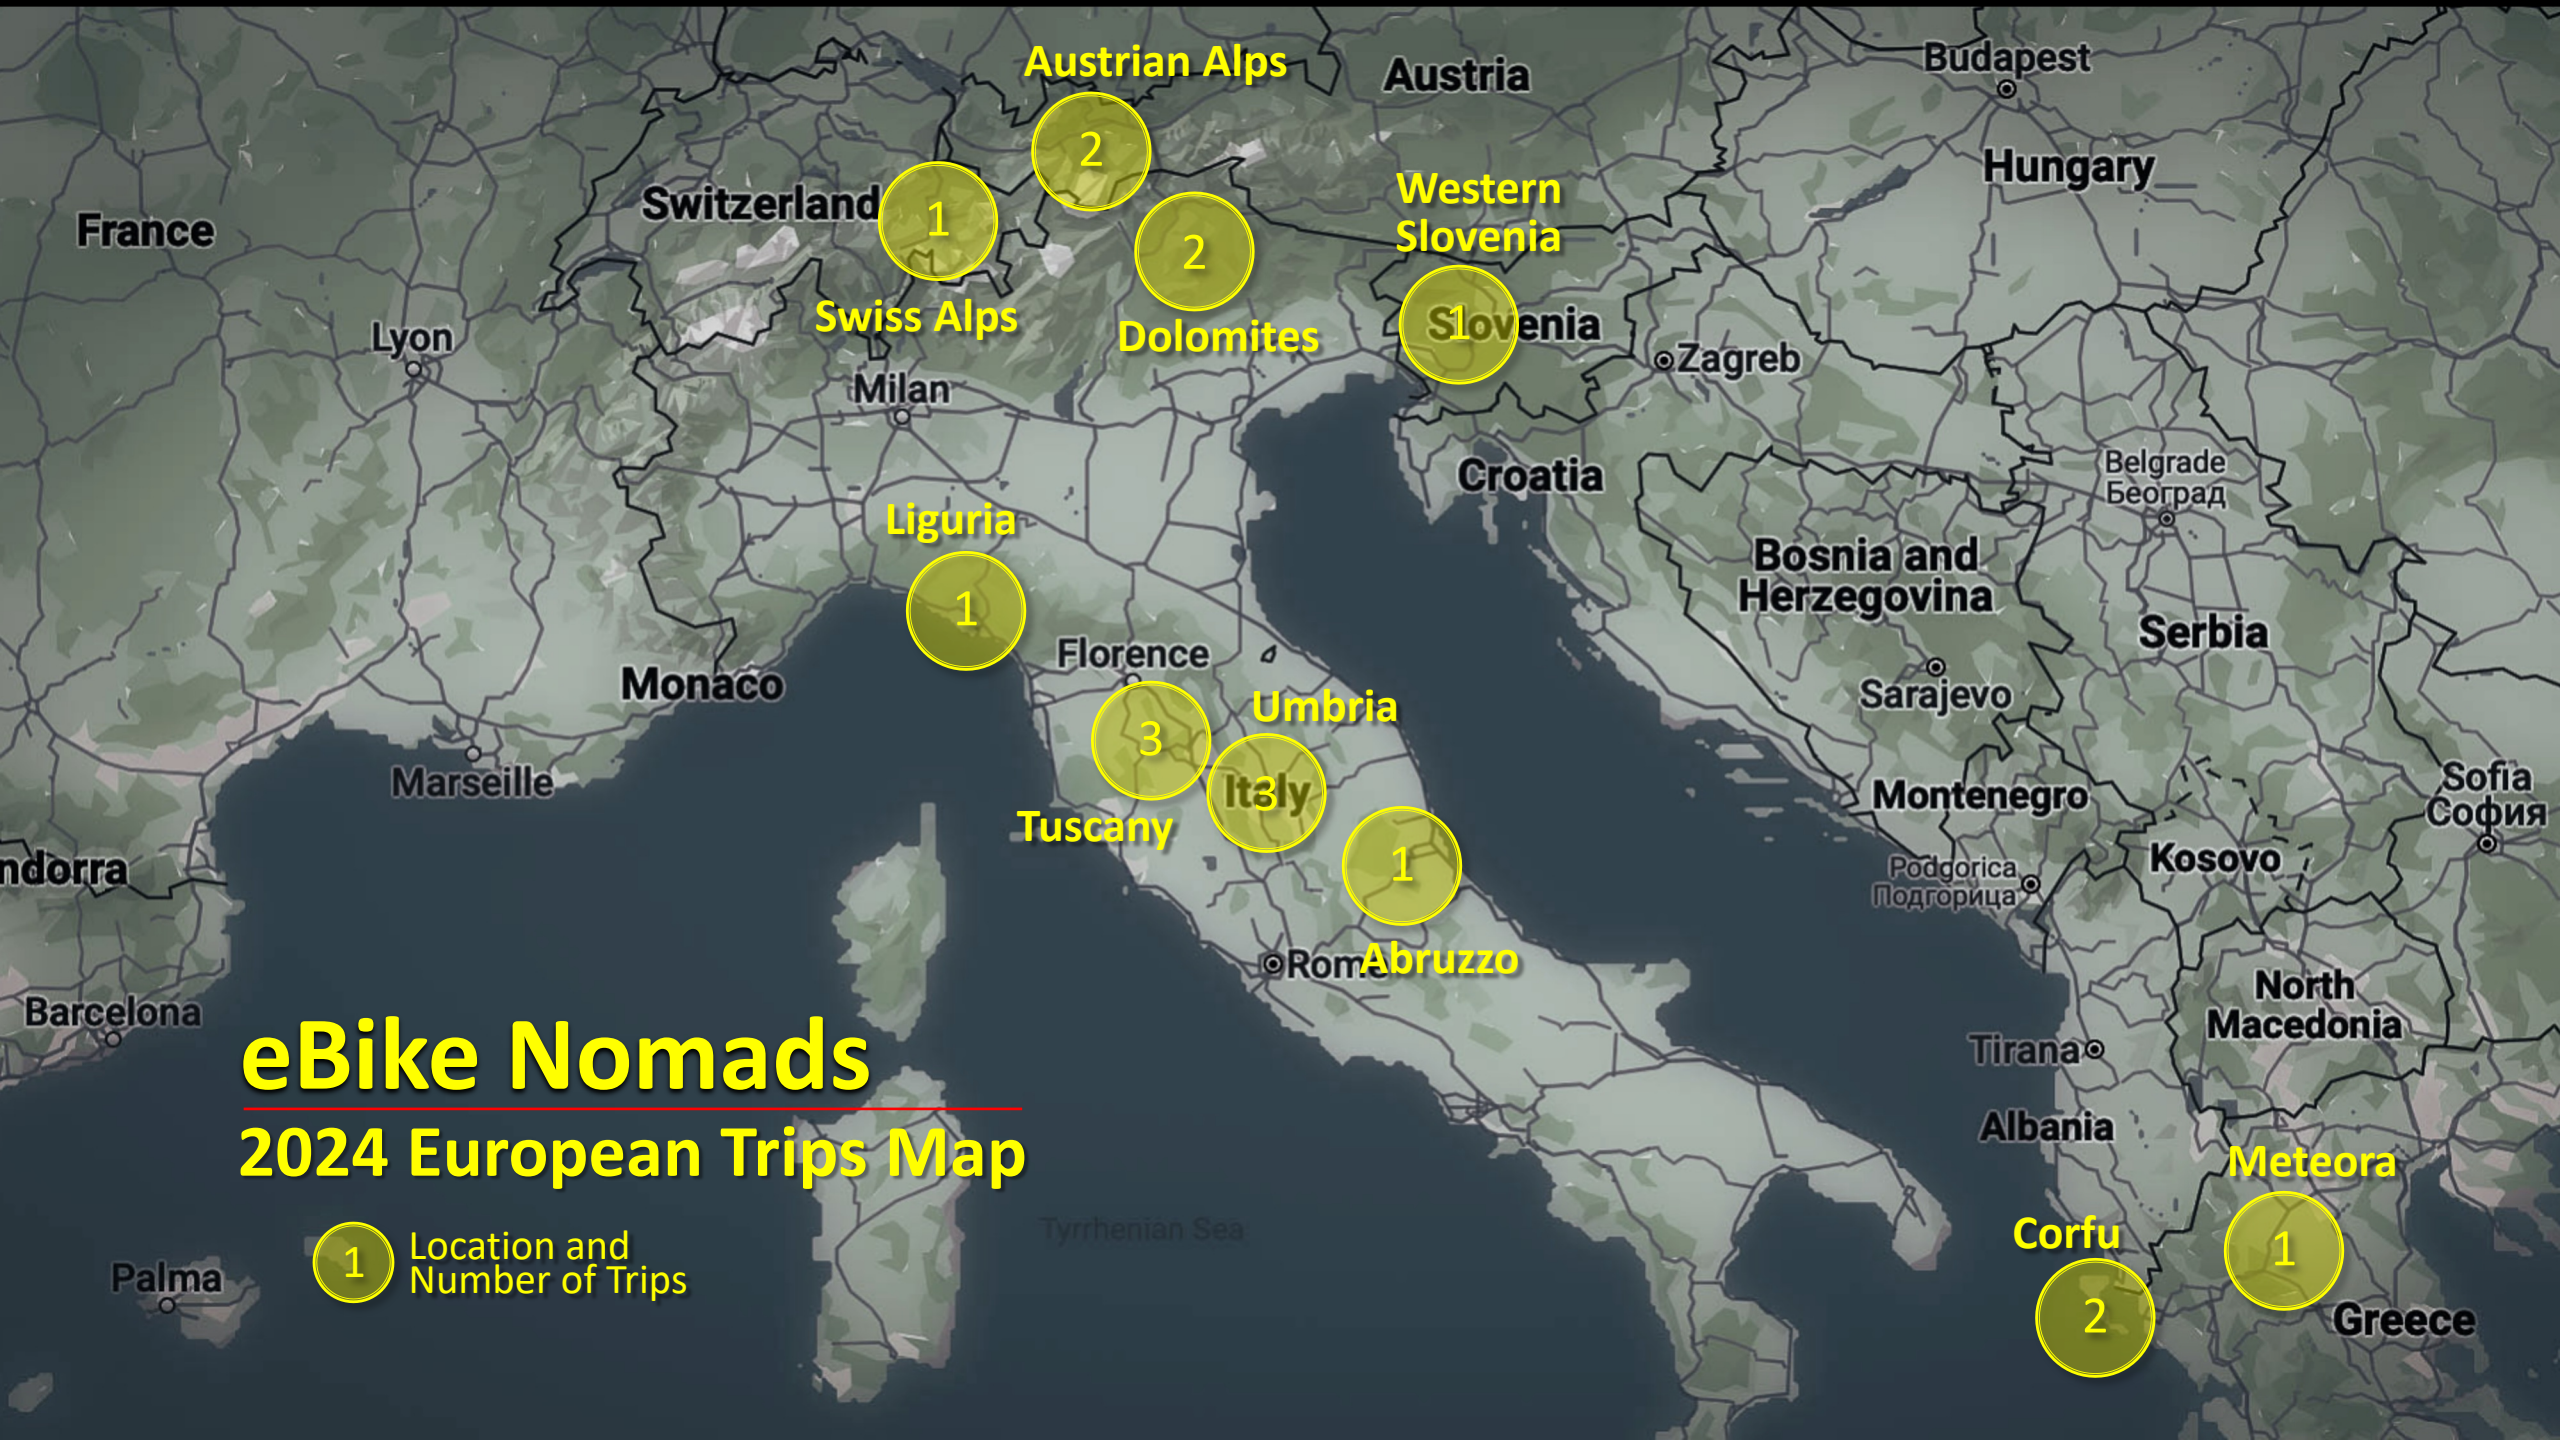

**Hello fellow adventurers.** Thank you for joining us and for taking the time to explore our 2024 season of tours. This year, we'll be visiting many of our favorite places, but have also added some very exciting locations and twists that we hope will interest not only those who love cycling and exploring as much as we do, but also to those who love photography and unspoiled nature.

**New travel partnerships.** We've partnered with professional photographer and teacher Russell Graves, who will co-lead several trips, taking us on photo shoots and conducting photography workshops each day. If you love photography, you won't want to miss these. We've also partnered with Alaska Sea Adventures to include ebike excursions on their Alaskan Inner Passage Tours. For over 50 years, Alaska Sea Adventures has hosted guests for whale watching, glacier and iceberg viewing, and for getting up close and personal with eagles, bears, otters, and other exotic life found along the fjords and passages of Southeast Alaska. We'll be adding ebike explorations to some of their trips, which may very well push the adventure level clear over the top.

**Hotels and Villas.** We're also introducing a bit of variety to the TYPES of places we stay on our trips. In the past, we've enjoyed fabulous boutique hotels that both pampered us and enhanced our adventure. We'll still feature "Cycling+Boutique Hotel" trips, where we stay at each hotel a couple of nights, then move on. But this year, we're also adding what we're calling "Cycling+Villa Tours," where we stay for a week at a magnificent villa. These grand manors provide well-appointed private bedrooms and baths, but also feature fabulous indoor and outdoor living spaces where we can spend time sharing experiences with new friends or old.

**Northern Song.** Oh, and there's Alaska Sea Adventures' 85-foot luxury yacht, Northern Song, that will be our home for the Alaskan tours. You won't believe it until you see it.

Settle in and allow us to share details of all the trips we'll be leading in 2024. We're sure there's at least one that will be calling out your name.

## Unique for a Reason

**Hello, I'm David Garcia...  
Founder of eBike Nomads.**

The first thing you'll notice about us is that we're **VERY DIFFERENT** from other bike tour operators—because we're really not a bike tour company at all. We explore spectacular places by eBike, but that's pretty much where any similarity ends. To better understand, let me tell you a bit about myself and why I created eBike Nomads.

**First, I'm a life-long cyclist.** I love bikes, planning bike trips, taking bike trips, talking about bikes and bike trips, and looking forward to my next bike trip. To say that I'm passionate about cycling is an understatement.

That said, **my cycling world changed the first time I explored Europe on a bike.** You see, another passion is old-world European architecture. As an architect myself, I've long held a love of centuries-old European villages and cities. I visited and photographed them when I could, but never really *experienced* these great places properly until I traveled amongst them by bike. To *absorb* at the pace of a bike rather than just *visit* by car or train was something that I did not anticipate... and something that became a life passion.

The third passion that plays into the eBike Nomads formula is **my love of sharing new experiences.** It's one thing to explore and be amazed but, for me, that joy is multiplied exponentially when it is experienced with others.

**So, there you have it: the basic recipe for eBike Nomads:** a simple organization that allows us to explore great places by bike—and share those experiences with a few new friends.

**Each year I select amazing places to visit and ride, then invite a few friends to customize those trips and join us.** We provide great eBikes, plan routes, book fabulous lodgings, provide vehicle and logistical support, and make it possible for you to join with the confidence that everything is ready for you to have an unforgettable experience. Just show up, hop on the bike, explore, eat great food, and create forever memories. All you need to bring is enthusiasm, a sense of curiosity, basic cycling skills, and a yearning for fun and adventure. We take care of the rest.

There's lots more information about our trips, plus the specific things that make our trips so special, on our website. You'll want to find a quiet time, grab your favorite beverage, and settle in to explore. Then hit that Contact Button us so that we can make one of these trips YOUR custom adventure.

**Happy Cycling... I hope to see you soon.**

## eBike Nomads Cycling Tours

Even as we expand our trip offerings—adding photography and sea excursions to our repertoire—we never forget that cycling is at the core of our DNA. The unique experience of exploring a new place at the speed of a bike allows us to absorb the culture and history of a place, to feel the changes and the nuances that are missed when visiting by car or train. For our trips, this experience is made even better because they're taken on one of our ebikes.

So, whether you're on a Traditional Cycling tour, a Photo+Cycling tour, or an Alaskan Adventure+Cycling tour, you can be sure that exploring by ebike will be a highlight of every trip, every day. Come join us... your ebike is waiting.

**Traditional Cycling Tours.** The heart and soul of any of our traditional bike tours is movement—movement through an area by ebike. We either stay in one town a couple of nights then ride towards our next rest stop, or we stay in a villa for the entire week as a base for our exploration. In either scenario, we ride as a group, and emphasize the pauses along the way as much as the ride itself. With spectacular vistas and interesting sites surrounding us, we usually spend as much time off the bike as on. But we've learned that this is exactly the right formula because we're not there to rush along. We're there to savor the experience, to taste, to watch, and to absorb. For any eBike Nomads adventure, we know that it's the journey that collects memories... every bit as much or more as the destination itself.

**Photo+Cycling Tours.** Here's the truth of the matter: We love photography as much as cycling, so we couldn't resist bringing the two together. For these trips, we feed the passion of photographers as much as we do for cyclists, always working to find the right balance between the two. Our solution is to be 100% flexible, for both the group and each individual. On any day, for any person, one or the other can be a priority. When you boil it down to basics, both photography and cycling exploration are on the menu every day, and you get to decide how much of each you want on your plate.

**Alaskan Adventure+Cycling Tours.** For these trips, the emphasis is clearly on the WOW of Southeastern Alaska, and no one delivers the wonders of that place like Alaska Sea Adventures. We're proud to join with them to take the experience "over the top" by adding ebike excursions to their trips. Getting up close and personal with the Alaskan wilderness is a special experience, and we're glad help get you out there just a bit farther.

# Tuscany, Italy

## Cycling+Boutique Hotels Tour

**Spectacular Tuscany.** There's a reason why Tuscany stands out as one of the most sought out travel destinations in Europe. Its breathtaking beauty is unparalleled, boasting rolling hills, never-ending vineyards and olive groves, captivating medieval hilltop villages, majestic castles, and a rich culture that has evolved over centuries. Bathed in an ethereal light that seems to emanate from within, this enchanting region provides the ideal backdrop for this week's cycling adventures and explorations. We'll visit some of the more famous Tuscan highlights, such as Florence, Siena, and Montepulciano, but it may be the tiny villages that see few outsiders that create the most lasting impact on us.

- Daily ebike rides throughout the region  
Visits to Tuscan towns and villages, including
- Florence, Italy
  - Radda in Chianti, Italy
  - Siena, Italy
  - Montelcino, Italy

**April 30-May 7, 2024**

**2023 PRE-SEASON SALE \$5,095**

**Two nights in Gaiole in Chianti.** At the end of our first ride through the Tuscan hills south of Florence, we'll glide into Gaiole in Chianti and our home for the first two nights. Gaiole in Chianti is pure charm, offering all the amenities we want, without the crowds of Florence.

**Two nights in Siena.** Siena stands as a special city among many special places in Tuscany. Step into Siena and you step back in time. It's architecture and citizens hold the past as one holds a precious relic. We are so very fortunate that they have taken such care... and that they share it with us.

**Two nights in Pienza.** On leaving Siena, we point our bikes towards Pienza, along the famed Cresta Senese, with a stop at an ancient monastery still alive today. In short order, we'll understand why Pienza and the broad Val d'Orcia region have earned designations as World Heritage Sites.

**Final night in Montepulciano.** Home to Popes and other dignitaries going back centuries, Montepulciano is the quintessential Tuscan hill town, with narrow, winding lanes leading ever higher to its church and plaza. We'll explore the town, then gather for a farewell dinner.

# Dolomites, Italy

## Cycling+Boutique Hotels Tour

**Legendary for a reason.** For most, the mere mention of Italian Dolomites sets off fireworks of spectacular mountain scenery—and rightly so. For hikers and bikers, summer brings a wonderland of treasures, with trails and lanes crisscrossing remote ridgelines. Cyclists from around the world arrive each year to challenge themselves on passes made famous by greats going back to the founding of bike racing itself. And for all the glory claimed by this place, precious little of its boasts can be disputed.

**A challenge worth taking.** For most, the mere mention of Italian Dolomites sets off fireworks of spectacular mountain scenery—and rightly so. There may be no more dramatic grouping of spires and rocky ridges jutting to the sky than that found in the Dolomites. We take this week to challenge the Dolomites, pure and simple. Our skills will be tested on a combination of rough gravel paths and strenuous climbs, crossing national parks off-road and finding places that only trekkers usually enjoy. This tour requires accomplished bike handling skills (especially for steep, loose descents) and strong legs, but—OMG—the rewards are truly epic and oh so worth it.

Influenced by Venetian, French, and British legacies, the island's vibrant culture is reflected in its architecture, cuisine, and spirited atmosphere. **Influences of the ages.** Corfu's history is a tale of diverse influences and conquests spanning centuries. Once under ancient Greek and Roman rule, the island later saw the imprint of the Byzantine Empire, the Normans, and the Angevins. The Venetians left a lasting architectural legacy, followed by French and British occupations during the Napoleonic era. This rich historical backdrop has shaped Corfu's cultural identity, leaving an indelible mark on its architecture, cuisine, and customs.

Corfu's enduring appeal lies in the harmonious blend of stunning natural landscapes, including olive groves and picturesque beaches, with a rich cultural tapestry steeped in the island's history of diverse influences. Whether cycling through winding mountain lanes, relaxing on the beach, or exploring the island's cultural and historical riches, Corfu offers something special for everyone.

**Cycling Corfu.** Make no mistake, Corfu attracts visitors in numbers that can be mind-boggling. But that is not to suggest that the entire island is congested—or even visited by tourists. The mountains have only small villages, accessed by narrow, winding lanes with little traffic. But it is exactly these lesser-visited areas that provide us the perfect cycling playground. Hundreds of miles of small roads, both paved and gravel, spread like a spider web across the mountain interior, connecting tiny villages that tell the story of Corfu's full-time residents. Vistas from cliff faces and mountain tops will stop us in our tracks, then point us to our next destination. Cycling on Corfu is a magical experience, often unknown to the typical visitor. But we'll share the secret, and you'll learn that Corfu is much more than its reputation as a great beach destination. So much more.

**A week of photography workshops.** This trip blends two of our favorite passions: cycling and photography. Each day will offer both the option to work on your photography or to explore by bike—or to do both. Formal morning photo shoots amongst the vineyards and monasteries, plus late light shoots at dusk, will highlight photography's greatest ally: magic light. As a professional photographer, Russell Graves has been studying light as it hits his eye and camera sensor his entire life. And, lucky for us, Russell will be with us this week to teach us what he's learned, to improve our ability to see both with and without a camera. And let's face it, everyone who longs to go to beautiful places wants photographs that do the original justice.

To learn more about Russell Graves and see a gallery of his fabulous work, visit his website at [www.HackberryFarmTexas.com](http://www.HackberryFarmTexas.com) or [www.RussellGraves.com](http://www.RussellGraves.com). Be sure to sign up for his newsletter and webinars and scroll through his catalogue of past instructive presentations.

**Cycling Tuscany.** As you move through Tuscany, you notice cyclists everywhere. There are paved roads that meander through forests and fields, offering vistas that are unparalleled anywhere. Pavement give way to gravel as we wend our way through olive groves and forested boundary lands. Olive groves turn to vineyards, with their perfectly spaced rows climbing hillsides and making serpentine patterns that catch the light, then let it go. Cycling Tuscany is anything but flat, but it's far from a sufferfest dealt out by steep mountain passes to the north and east; cycling in Tuscany is pure bliss, with ear-to-ear smiles to prove it.

**Cycling off the beaten path.** The area that we'll explore on this trip is a north-south strip where the Apennine Mountains begin their rise from the broad valley extending to its west. This junction of horizontal and vertical will be our playground for this trip, offering both immersive visits to medieval towns, and rides through forests, vineyards, and olive groves. We'll wind our way into and out of low mountains, lost in a peace far from the towns, then pop into bustling lanes filled with shops and restaurants. Our cycling adventures are the perfect complement to time spent exploring basilicas, fortresses, and narrow, walled lanes. Umbria is a place much off the beaten path, but so very much the essence of ancient Italy.

**Spectacular southeastern Alaska.** Southeastern Alaska's Inside Passage is a breathtaking mosaic of natural beauty and animal habitats unlike any other. Towering fjords adorned with cascading waterfalls create an awe-inspiring backdrop. Glaciers like the awe-striking LeConte Glacier offer a glimpse into Earth's ancient majesty. Rich marine life, from orcas to humpback whales, plus otters and seals, thrives in these nutrient-rich waters. Charming coastal towns like Petersburg and Sitka boast immigrant and indigenous culture, art galleries, and totem poles that narrate stories of the land. Being the adventurous souls that we are, we'll explore the National Forest's dense wilderness and cruise hidden waterways that highlight the area's mystical allure.

**Alaska Sea Adventures.** We partner with Alaska Sea Adventures for a bike-and-sail excursion on their spectacular 85-foot Northern Song tour boat. Two powered Zodiac skiffs and five kayaks facilitate cycling on sparsely populated islands, close-up glacier viewing, visits to villages, hiking, and other water and land-based activities. Yacht accommodations are pure luxury, including private cabins, Starlink internet, a fabulous salon, access to wheelhouse or upper viewing deck, and a chef who prepares three gourmet meals each day. Both trips start and finish in Petersburg, Alaska, with the first also affording us to be in Petersburg for its Little Norway Festival, a street fair that celebrates the town's Scandinavian roots.

**Bikes on a boat.** Alaska Sea Adventures has been leading tours through the waterways of Southeast Alaska for decades, but, for the first time, guests will have the opportunity to cycle some of the most remote and least inhabited (by humans) places in the US by bicycle. eBike Nomads will lead cycling outings on our ebikes on remote islands, inland roads, and through small villages that can often be accessed only by boat. But let's be clear: this trip is not centered on cycling. The sheer spectacle of Southeast Alaska, best experienced via its waterways, is reason enough to visit. That we're adding the opportunity to cycle a few times during the week is just a bit more icing on an already fabulously decorated cake.
